Phazzo Privacy Policy -

No user-specific information of any kind is used within the application.

Phazzo will, however, display the date and location a photo was taken if iOS Location services for the Camera were enabled at the time it was used. Otherwise only the date will appear after a photo puzzle is solved.

Scrambled photos sent to another user via iMessage will not include the date and location.

Phazzo is a free application for use on iPhones only and requires no personal information in order to use it. It is suited for ages 4 and up.
